

Dear Varsha

I just got my computer back after it had got a virus there was a trouble for a month . I just finished the art camp with the kid it was 20 day camp for school holiday at my studio...to earn some money.

Is it too late time to send to you a cd & text about the art camp during the trouble with thai/comboia for womanifesto website? I have already prepare them if you think it 's not too late I will send to you.

Varsha I have many thing in my mind and I need to communicate to somebody I decided to wrote a long letter to Phabtawan last night for explain my situation and today I would like to tell you too. I wrote to Phabtawan first because it easier to communicate in Thai, but I didn't feel released if I don't tell you...because both of you I fell like my elder sisters who is always sincere and supported me and we were concerned and work together for the womanifesto project for many years.

From the last womanifesto project that we felled about sponsorship and I told both of you I want to get a break that because I want to settle problems of myself with 3 reasons 1.family relationship 2.work and income 3. The future of womanifesto

1.family relationship : my relationship between me and Ngam is got worst , we have so much problems together main reason is because we can't communicate to each other can't exchange every time when we do any conversation there was a quarrel, so we decided to separate since 3 months ago, he move to live in the farm, that was better chance for both of us each once have got our own space and I am more happy now.

2.work and income : As you know I had invest to developed my studio turn in to a gallery space&studio, send out 300 brochours to all school in Kantarak but there was no any respond. And couldn't sell any art work how sad to be a Thai artist.....and Ngam he never earn enough money to support the family. This really disturb my mind because I am getting older and older but my 2 kids is still very young this is a big responsible in my head all the time. I Can't concentrate on my artwork.

3. The future of womanifesto : I feel guilty that I can't do anything much because I have thinking only how to make my family survived. But Varsha I have got a dream since many many year ago that I want to do a woman art museum I remember once Manit had interview me I said to him about this dream and he said my dream is too big and impossible...but I still have this dream in my mind.

Then in January there was somebody (Nok & Kim)introduce me an opportunity to join the project business : The Happy life project it is a multi level network marketing which is only 500 bht. Investment ,I decided to join this project and I spend a time for 2 months to learn about this business from book, cd, camp and seminar.

Don't you think is strange that I turn myself to a business person?

But, I think in this business there need to create a real art form as well...and I can feel so much of humanity and reality.

What make me decided to this business:

- 1.I can do a network all over Thailand and over 20 countries.
- 2.This will be a future business(Wealthness industry) in the next 10 years, each house will got at least one network.
- 3.The product is high quality and 100% from nature/ no sight effect. Because is made from the 2 big company in America (Utah) : Rexall + Enrich and the product have accepted from the doctor over the world like Mims (Asia) /PDR (Physical Desk Reference) in USA& Europe.
4. There is a system to work / Key Performance Indicator to guarantee the success.

The nature of this business is :

1st year is work hard but little money .

2nd year is work less and less but more and more money.

3rd year is work very little but big amount of money (a million)

4th year is retire from the work but not retire the income. Can do whatever I want to do.

5. None of any business can benefit this goal because this is a power of the network which is use a theory of the Leverage.

6. The next 4 years I will have my dream come true...The next of Womaifesto project...and this is not a joke...Varsha

Why don't all women artists in the world could join this business and we will have women museum all over the world....?
Can you imagine how fun?

Tuk.
